Super Rider can't jump tall buildings but that's about all he can't jump. Sitting astride a super-charged dirt bike, Super Rider takes on the ultimate motorcycle obstacle course. Quickly entering the course, Super Rider is soon leaping over giant boulders, pickup trucks, police cars, and various other obstacles. He is also required to go through several loop-the-loops as well as find a safe and sane way through the course. At the end of each section the player vies for bonus points. Super Rider is a Super Kit at a Super Price.
